PolyClad Wood Shutters

**Good for the Environment.  
Good for Your Bottom Line.**

If "going green" isn't on your To Do List, it should be. Why? Because doing so can set you apart from your competition.

While your customers are becoming more eco-conscious, our industry is continuing to spew millions of pounds of harmful chemicals into the environment each year. Luckily, there really is a better alternative: ShutterSMART's PolyClad Wood Shutters.
